SATB2
SOX10
SMAD3
NFE2L2
CUX1
c
Target-set size drives enrichment yield
Significant GO + KEGG terms
Regulon-target set size (log scale)
d
GO terms shared across candidates
shared by
Modulation of synaptic transmission
Regulation of GTPase activity
Chloride transmembrane transport
Chemical synaptic transmission
Monoatomic anion transport
− DNA-templated transcription
Phosphorylation
− Nucleic acid transcription
+ GTPase activity
+ Hydrolase activity
+ Intracellular signalling
+ DNA-templated transcription
